React Native
Firebase
State Management
Native Development
API Integration
Communication Skills

Experiences

REACT NATIVE DEVELOPER

Gaint Head, Gujrat (January 2023-March 2024)

- Developed cross-platform mobile applications using React Native.
- Collaborate with a team of front-end and back-end developers to design and implement features, ensuring seamless integration with RESTful APIs.
- Implemented Redux for state management, improving application performance and maintainability.
- Worked closely with UI/UX designers to ensure a consistent and user-friendly mobile app interface.
- Developed new features in projects and implementing them as per requirements.

Projects

WOMEN'S SAFETY APP (FYP)

Created a user-friendly cross-platform Women's Safety App. In this Project we worked on the safety of women's because we know that most of the women face safety issues while leaving homes. For this purpose they can install this app in their smartphones. After creating an account they can add some emergency contacts in this app and alert by sending text or call them in case of emergency. They can also take help by sharing their current locations. They can also aware about their proper rights that we added in this application.

PLUMM APP

Leveraging React Native, Plumm's workplace mental health platform delivers a comprehensive employee support system. The Plumm app, built in a team using React Native, is like a friend for employees at work. It offers a variety of helpful things, such as calming sounds, meditation guides, and even video sessions with coaches and therapists. It's there to make sure employees feel good and get the support they need, making work a better place.

TRUSTAR

TruStar is a fun music app, like TikTok, made with React Native and Firebase. You can find and upload your favorite songs with short videos. Firebase makes sure everything works well and is safe. You can upload, like, and comment on music videos, connecting with other music lovers. TruStar is where you can enjoy music and feel safe doing it.

BABY APP

Created a user-friendly baby app using React Native in a team empowering parents to effortlessly track and monitor their baby's health and developmental milestones. Implemented intuitive features for easy navigation and data input, fostering a seamless parenting experience. Designed with care to provide invaluable support to parents on their child's journey to growth and well-being.
